

Hairstyles

Upon first glimpse, the strongest impression that one gets of a new person is that of their hair. It is at the body's highest point, it stands out, and it is independent of the other parts of the body, so it easily attracts attention. People also remember the impression made by a person's hair; scientists have proven that the colour and style of hair is what lingers when two people make eye contact for five seconds. In such a short glance, the face, eyes, nose, or lips can be misremembered, but the memory of the hair is accurate.

From time immemorial, the importance of hair to a person's beauty has been known. Each hairstyle not only portrays one's personality, but also provides the ability to update one's fashion quickly. Besides a costume and accessories, choosing a hairstyle is a priority, because it accompanies you everywhere you go. A beautiful hairstyle can help you feel more confident and assured, while a disastrous or inappropriate haircut can leave you self-conscious and awkward, waiting for your hair to grow so you can remedy the embarrassment. Indeed, in America, bad haircuts are actually a remarkably common reason for lawsuits.
