

Kiwis

The kiwi is a bird that only lives in New Zealand. It is strange because it has no wings, it has no tail, and it cannot fly. Its feathers look like hair, its feet have four toes, and it has a very long beak.

Kiwis like to live in places with lots of trees. They sleep during the day and are awake at night. They can smell things very well.

There are not many kiwis left in New Zealand. New Zealanders want to protect their kiwis, and nobody is allowed to kill them. New Zealanders love the kiwis. There is a picture of a kiwi on the money in New Zealand, and people from New Zealand are sometimes called 'kiwis'.
